PERSONAL PROJECTS

Malaria Detection Using CNN | Transfer Learning

- Helps Doctors to Determine Malaria through Microscopic Blood Images
- <https://github.com/Omkar1600/Malaria-Detection-cnn->

Classifier Comparer

- Gives you the best classifier for your dataset by comparing your dataset with multiple classifiers eg SVM , Random forest etc
- <https://github.com/Omkar1600/Classifier-Comparer>

Fake News Classifier NLP | Machine Learning

- Classifies if your News is fake or reliable using NLP and Machine learning algorithms
- <https://github.com/Omkar1600/Classifier-Comparer>

Churn Classifier ANN

- Tells you if the customer is going to leave your service by using Artificial Neural Network
- <https://github.com/Omkar1600/ANN>

Credit Loan Determiner

- Helps in finding if a person s going to get a credit Loan
- <https://github.com/Omkar1600/Cedit-Loan>

EDA Of Google Play store

- Provides you an overview about google Play store apps

CERTIFICATES

Machine Learning with Python : Zero to GBMs (07/2022)

Jovain

End-to-End Machine Learning with Tensor Flow on Google Cloud (07/2022)

Google Cloud

Production Machine Learning Sytem (07/2022)

Google Cloud

Google Data Analytics (05/2022 - Present)

ACHIEVEMENTS

Sea Cadet Training (2014 - 2018)
